Nye krav til beskyttelsesbeklædning

- DS/EN 340 – Generelle krav.
- DS/EN 1149-5 – Elektrostatiske egenskaber.
- DS/EN ISO 11611 – Beskyttelsesbeklædning til brug ved svejsning.
- DS/EN ISO 11612 – Beskyttelsesbeklædning til beskyttelse mod varme og ild.

EU har vedtaget en række europæiske standarder til beskyttelsesbeklædnings ydeevne og design, som J.A.K. Workwear har været forpligtiget til at indarbejde i produktlinjen af antinflame produkter.

Kravene er opstillet for at højne tøjets beskyttelseseffekt - og dermed være medvirkende til en bedre personlig arbejdssikkerhed.

Alle vore produkter, der bærer antinflame mærkatet, lever op til myndighedernes og offshore-operatørers krav.

New requirements for protective clothing

- DS/EN 340 – General requirements.
- DS/EN 1149-5 – Electrostatic properties.
- DS/EN ISO 11611 – Protective clothing for use in welding.
- DS/EN ISO 11612 – Protective clothing for protection against heat and fire.

The EU has passed a number of European standards for the performance and design of protective clothing, which J.A.K. Workwear have been obligated to work into the product line of antinflame products.

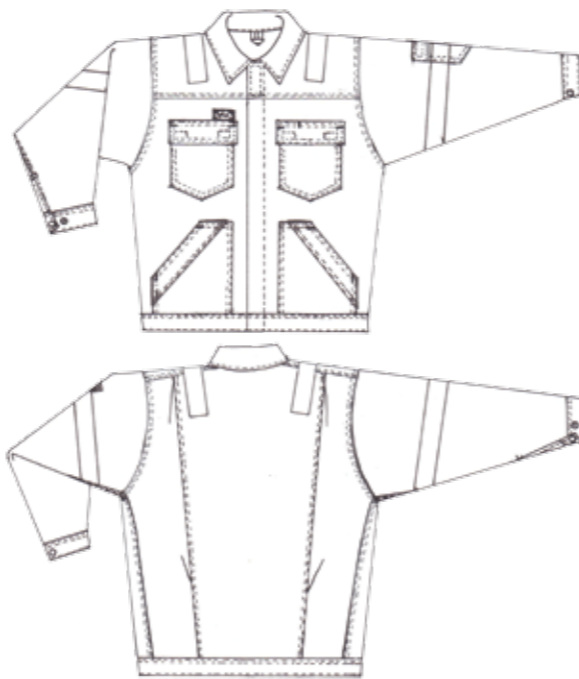

The requirements have been put in place to increase the clothing's protective effect and thus contribute to better personal work safety.

All our products, which bear the antinflame label, live up to the requirement of the authorities and offshore operators.
